PROFESSIONAL PROFILE

Full Stack Developer and Computer Science student, with experience building **real products** for retail businesses and SMEs. I work with **React, Next.js, Node.js, TypeScript, PostgreSQL and Supabase**. I'm looking to join a development team where I can contribute hands-on experience with real products, deepen best practices and grow professionally.

PROFESSIONAL EXPERIENCE

Full Stack Developer — SaaS Product for Retail

2022 – Present

Venta Simple · Own product · Remote / Rosario, Argentina

- Designed and built an **end-to-end product** for retail: architecture, database, frontend, backend, deployment and support.
- Sales, stock, cash, customers and e-invoicing management system, **live in production since July 2025**, used daily by 5 cashiers and processing **200+ sales per day**.
- Cut the **average checkout time from over 2 minutes to about 30 seconds** per sale, through continuous optimization of the flow for keyboard, barcode scanner and offline-first operation.
- Reduced **payment errors by over 50%** by digitizing cash, stock and invoicing, eliminating manual tasks.
- Implemented **integrations** with Mercado Pago, WhatsApp Business API and AI applied to business data.

Stack: React · Next.js · Node.js · TypeScript · FastAPI · Supabase · PostgreSQL

Operations & Technology Lead

Dec 2019 – Sep 2025

La Macelleria · Rosario, Argentina

- Led the **operational digitalization** of the family business: stock, sales, tickets, internal processes and daily control.
- Trained a **team of 5** on internal digital tools.
- Implemented tech improvements that **reduced manual processes** and operational errors.
- Coordinated the **tech setup for a new store opening**.

QA Tester – International Projects

2022 – 2023

uTest · Remote

- Ran **functional and manual testing** cycles on e-commerce platforms for clients in the US and Europe.
- Documented test cases and reported bugs in **Jira**, with traceability for international development teams.

Stack: Selenium · Postman · Jira

FEATURED PROJECTS

🛒 Venta Simple — Management SaaS [live demo]

Offline-first POS, web dashboard and mobile app for sales, stock, cash and invoicing. **Live in production since 2025, with 200+ sales per day.**

Next.js · Node.js/FastAPI · Electron · Mobile app · Supabase · Mercado Pago · WhatsApp API

💬 Axiia / Kairos — AI assistants

SaaS platform of conversational assistants for customer service, sales, bookings and after-sales. Works via WhatsApp and an embeddable web widget, with configurable business rules and API cost under control.

React · Node.js · PostgreSQL · Redis · WhatsApp Business API · OpenAI API

🔥 IoT — LINEup / AgriSense · ESP32 monitoring

LINEup: cold-chain traceability for commercial fridges and cold rooms, with temperature history, WhatsApp alerts, configurable thresholds and per-unit door-open monitoring. **In use for over a year at La Macelleria.** **AgriSense**: humidity/temperature monitoring and automated irrigation for nurseries, connected to a mobile control app.

ESP32 · sensors · Node.js · WhatsApp API · mobile app
