PROFESSIONAL PROFILE

Product-oriented Full Stack Developer with 3+ years building real solutions for retail and SMEs. I built end-to-end systems with **React, Next.js, Node.js, TypeScript, Flutter and Supabase**: offline-first POS, web dashboards, mobile apps, integrations with Mercado Pago and WhatsApp Business API, and **AI applied to business processes**. I focus on functional, scalable and usable products —from architecture and backend to user experience. I'm looking for remote opportunities where I can bring autonomy, product judgment and the ability to turn real problems into software that runs in production.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Freelance

2022 – Present

Independent Projects · Remote / Rosario, Argentina

- Designed and built end-to-end **SaaS products** and internal tools for retail and SMEs: frontend, backend, database, external integrations and deployment.
- Integrated **external APIs** (Mercado Pago, WhatsApp Business API, Brave) and **AI applied to operational data analysis** and decision-making.
- My products are **in real use, in production with active clients** (details below).

Stack: React · Next.js · Node.js · TypeScript · FastAPI · Flutter · Supabase · PostgreSQL

Operations & Technology Lead

Dec 2019 – Sep 2025

La Macelleria · Rosario, Argentina

- Led and trained a **team of 5** on internal digital systems.
- Designed and implemented an **internal system (Node.js / Next.js)** for stock, sales and tickets, replacing 100% manual processes.
- Coordinated the **opening of a new store**, managing all the tech operations from scratch.

QA Tester – International Projects

2022 – 2023

uTest · Remote

- Ran **functional and manual testing** cycles on e-commerce platforms for clients in the US and Europe.
- Documented test cases and reported bugs in **Jira**, with traceability for international development teams.

Stack: Selenium · Postman · Jira

FEATURED PROJECTS

Venta Simple — Management SaaS [\[live demo\]](#)

Offline-first desktop POS, web dashboard and mobile app for sales, stock, customers, cash and electronic invoicing. Integrates Mercado Pago, WhatsApp API and AI over the business data. **In active use by real businesses.**

Next.js · Node.js/FastAPI · Electron · Flutter · Supabase · Mercado Pago · WhatsApp API

Axiia / Kairos — AI assistants

SaaS platform of conversational assistants for customer service, sales, bookings and after-sales. Works via WhatsApp and an embeddable web widget, with configurable business rules and API cost under control.

React/Flutter Web · Node.js · PostgreSQL · Redis · WhatsApp Business API · OpenAI API

IoT — Monitoring & traceability (ESP32)

Temperature traceability for fridges and refrigerated transport: alerts when it leaves the configured range (e.g. 0–5 °C) and history — **in use for 1 year at La Macelleria**. Also humidity/temperature monitoring with automated irrigation for nurseries.

ESP32 · sensors · MQTT · Flutter · Python
