PROFESSIONAL PROFILE

Product-oriented Full Stack Developer with experience building real systems for retail businesses and SMEs. My main stack includes **React, Next.js, Node.js, TypeScript, PostgreSQL and Supabase**. I build end-to-end solutions such as **offline-first POS systems**, web dashboards, mobile apps and integrations with Mercado Pago, WhatsApp Business API and AI applied to business data. I use **AI tools** to speed up prototyping, debugging and documentation while maintaining technical ownership over architecture, quality and product decisions.

PROFESSIONAL EXPERIENCE

Full Stack Developer — SaaS & Business Software Projects

2022 – Present

Independent Projects · Remote / Rosario, Argentina

- Designed and built **end-to-end products** for retail and SMEs: architecture, database, frontend, backend, deployment and support.
- Built **management systems** for sales, stock, cash, customers and electronic invoicing in real use, focused on **offline-first** operation and reliability.
- Implemented **integrations** with Mercado Pago, WhatsApp Business API and AI applied to business data.
- Brought **AI-assisted development** into my workflow to speed up prototyping, debugging and documentation, while maintaining technical ownership over architecture, quality and product decisions.

Stack: React · Next.js · Node.js · TypeScript · FastAPI · Supabase · PostgreSQL

Operations & Technology Lead

Dec 2019 – Sep 2025

La Macelleria · Rosario, Argentina

- Led the **operational digitalization** of the family business: stock, sales, tickets, internal processes and daily control.
- Trained a **team of 5** on internal digital tools.
- Implemented tech improvements that **reduced manual processes** and operational errors.
- Coordinated the **tech setup for a new store opening**.

QA Tester – International Projects

2022 – 2023

uTest · Remote

- Ran **functional and manual testing** cycles on e-commerce platforms for clients in the US and Europe.
- Documented test cases and reported bugs in **Jira**, with traceability for international development teams.

Stack: Selenium · Postman · Jira

FEATURED PROJECTS

Venta Simple — Management SaaS [\[live demo\]](#)

Offline-first desktop POS, web dashboard and mobile app for sales, stock, customers, cash and electronic invoicing. Integrates Mercado Pago, WhatsApp API and AI over the business data. **In active use by real businesses.**

Next.js · Node.js/FastAPI · Electron · Mobile app · Supabase · Mercado Pago · WhatsApp API

Axiia / Kairos — AI assistants

SaaS platform of conversational assistants for customer service, sales, bookings and after-sales. Works via WhatsApp and an embeddable web widget, with configurable business rules and API cost under control.

React · Node.js · PostgreSQL · Redis · WhatsApp Business API · OpenAI API

IoT — LINEup / AgriSense · ESP32 monitoring

LINEup: cold-chain traceability for commercial fridges and cold rooms, with temperature history, WhatsApp alerts, configurable thresholds and per-unit door-open monitoring. **In use for over a year at La Macelleria.** **AgriSense:** humidity/temperature monitoring and automated irrigation for nurseries, connected to a mobile control app.

ESP32 · sensors · Node.js · WhatsApp API · mobile app
