PROFESSIONAL PROFILE

Product-oriented Full Stack Java Developer with experience building real systems for retail and SMEs. I mainly work with **Java, Spring Boot, Spring Security, Hibernate/JPA and PostgreSQL**, exposing REST APIs consumed by React frontends and a JavaFX desktop POS. I build end-to-end solutions such as **offline-first POS**, web dashboards, mobile apps and integrations with Mercado Pago, WhatsApp Business API and AI applied to business data. I use **AI tools** to speed up prototyping, debugging and documentation, while keeping my own technical judgment over architecture, quality and product.

PROFESSIONAL EXPERIENCE

Full Stack Java Developer — SaaS & Business Software Projects 2022 – Present

Independent Projects · Remote / Rosario, Argentina

- Designed and built **end-to-end products** for retail and SMEs: **Java / Spring Boot** backends (REST, Spring Security, Hibernate/JPA over PostgreSQL) and JavaFX desktop apps.
- Built **management systems** for sales, stock, cash, customers and electronic invoicing in real use, focused on **offline-first** operation and reliability.
- Implemented **integrations** with Mercado Pago, WhatsApp Business API and AI applied to business data.
- Brought **AI-assisted development** into my workflow to speed up prototyping, debugging and documentation, while keeping my own technical judgment.

Stack: Java · Spring Boot · Spring Security · Hibernate/JPA · PostgreSQL · JavaFX · React · Docker · Maven

Operations & Technology Lead

Dec 2019 – Sep 2025

La Macelleria · Rosario, Argentina

- Led the **operational digitalization** of the family business: stock, sales, tickets, internal processes and daily control.
- Trained a **team of 5** on internal digital tools.
- Built an **internal system in Java / Spring Boot** that reduced manual processes and operational errors.
- Coordinated the **tech setup for a new store opening**.

QA Tester – International Projects

2022 – 2023

uTest · Remote

- Ran **functional and manual testing** cycles on e-commerce platforms for clients in the US and Europe.
- Documented test cases and reported bugs in **Jira**, with traceability for international development teams.

Stack: Selenium · Postman · Jira

FEATURED PROJECTS

Venta Simple — Management SaaS [\[live demo\]](#)

JavaFX offline-first desktop POS, **Spring Boot** backend, web dashboard and mobile app for sales, stock, customers, cash and electronic invoicing. Integrates Mercado Pago, WhatsApp API and AI. **In active use by real businesses.**

Java · Spring Boot · JavaFX · React · PostgreSQL · Mercado Pago · WhatsApp API

Axiia / Kairos — AI assistants

SaaS platform of conversational assistants for customer service, sales, bookings and after-sales. Works via WhatsApp and an embeddable web widget, with configurable business rules and API cost under control.

Java · Spring Boot · PostgreSQL · Redis · WhatsApp Business API · OpenAI API

IoT — LINEup / AgriSense · ESP32 monitoring

LINEup: cold-chain traceability for commercial fridges and cold rooms, with temperature history, WhatsApp alerts, configurable thresholds and per-unit door-open monitoring — **in use for over a year at La Macelleria**. **AgriSense**: humidity/temperature monitoring and automated irrigation for nurseries, with a mobile control app.
